You Have Options!

Considering how to handle your upcoming **VMware Renewal?**

RENEW VMWARE

If you're **not** ready to migrate from VMware due to workload or other constraints, understanding the new licensing structure is important.

RETHINK VMWARE

The new product portfolio has both cost and functionality impacts- the Azure VMware Solution can help migrate/extend to the public cloud for workload mobility and avoiding unnecessary costs.

RE-PLATFORM VMWARE

Still need to support on-premise or hybrid workloads? Rebalancing workloads will require a common cloud platform. Nutanix supports both on-premise/edge and hybrid workloads.

MIGRATE TO AZURE

Ready to remove on-premise infrastructure and move to the cloud? Leverage flexibility and scalability while avoiding costly infrastructure cost increases (hardware and licensing).

Let's Build A Plan
